

Dear Sirs,

We kindly inform that during diagnostic endoscopic procedures, medical indications may occur to perform additional medical procedures, such as: polyp removal, argon beam coagulation of lesions, collection of tissue samples for histopathological analysis, ink staining of lesions, urease test for diagnosis of Helicobacter pylori infection.

Therefore, please take a close look at the pricelist because the total cost of the endoscopic procedure (along with the additional procedure) will change, e.g. the cost of the colonoscopy with polypectomy and histopathological analysis with anesthesia will be PLN 1940

The prices of individual medical procedures are enclosed on the back of the page, in annex no. 1.

I have read and understood the information prospectus concerning the pricelist of medical procedures performed at Endoterapia PFG Sp. z o.o. (tick the appropriate box):

☐ **I agree to incur costs of the additional procedure**

☐ **I do not agree for the additional paid procedures to be performed during the diagnostic procedure**
